OFFSHORE WIND

TURBINE FOUNDATIONS ENGINEERING
MARINE OPERATIONS ANALYSIS

TDA has played a central role in the Detailed Design of the 84 jacket foundations for the Ormonde, Alpha Ventus and Thornton Bank II & III wind farms

TDA IN GENERAL

TDA is an engineering company that focus on design of steel foundations for Offshore Wind. The company has a strong track record in any phases from studies to Detailed Design of jackets and monopiles. TDA combines deep theoretical knowledge, advanced analysis and applied engineering expertise to establish world class solutions. Among our clients are Statoil, DONG, Statkraft, Hochtief, MT Højgaard, Technip, COWI and OWEC Tower.

TURBINE FOUNDATIONS ENGINEERING

- Jackets
- Monopiles
- Floaters
- Primary Steel
- Secondary Steel
- Studies, FEEDs and Detailed Design

MARINE OPERATIONS ANALYSIS

- Loadout
- Transport
- Lifting
- Upending
- Installation
- Vessel impact
- Site assessments
